PCL Nursing 1st Year community field report

Venue: Damak - 1, Bhangbari

Date: 2081/08/23 to 2081/09/26

Objectives of community field are:

- Identify the different places, besides hospitals where nursing care is provided.
- Use the theoretical knowledge of primary health care in the community setting.
- Identify the problems of clients in home situation.
- Identify the problem and needs of community through community diagnosis.
- Use the nursing process in dealing with individuals, families and the community in order to solve their health problems.
- Plan and conduct community level health action to the groups of people by using the epidemiological approaches.
- Use appropriate communication skills while helping clients in the community
- Utilize the local resources in solving the problem in the community.
- Advise the preservation of the nutrient values in the foodstuffs for the sake of good health.
- Refer clients to appropriate places according to their needs.
- Explain the gender status in the community/health facilities and provide gender friendly services to maintain the quality of care.
- Visit to different home.

Activities

PCL nursing first year students went to Damak -1, Bhangbari for community field visit from the date 23/08/2081 to 26/09/2081. Students visited home and filled family folder about a week from 23/08/2081- 28/08/2081. During that period, they also found the boundaries and area map

of that community by visiting local leader of the community. Then students provided Informal and formal both kinds of health teaching to the people of community in family from 30/08/2081-05/09/2081 according to their health-related needs. Students provided family health teaching in different topics like: Breast feeding, handwashing, Bed sore, Hypertension, waste management, worm infestation etc. After the family health teaching, students provided health teaching in school named Bhrikuti Ma Vi, Bhangbari from 07/09/2081- 12/09/2081. It took nearly 2 weeks to complete both activities. At 4th weeks students were divided into two groups and they provided health action in the community by demonstrating to the people of community by utilizing local resources. At fifth week or last week of community field visit on the date of 26/09/2081, students presented all the data of family folder in statistical form by different teaching learning aids. After grand community presentation community field visit was completed.

Thanking you

AIHS, Damak
