

AMDA Institute of Health Science

Damak, Jhapa

Report on School Health Program of General Medicine 3rd year (group A)

Program Date 2081/02/06

Background

On 6th Jestha 2081, we departed from AMDA Institute of Health Science (AIHS) to Mechinagar, Dhulabari, Jhapa for the purpose of supervision and evaluation of school health program conducted by the students of general medicine 3rd year (group A).

Introduction

A school health program is an effective means of raising health awareness at the community level through students. As per the curriculum of general medicine prescribed by CTEVT, the students are required to go to the community to perform community diagnosis. During the process of community diagnosis, students have to identify the health issues that the community is facing and provide intervention through school health program. They selected enteric fever and oral health care topic .

Program Details

Date:2081/02/06

Time: 11 AM onwards

Venue: Shree Sishu Sakshar Adharbhut Vidyalaya, Mechinagar, Dhulabari. Jhapa

Supervisor

S.N.	Name	Designation
