Activity details

We had conducted school health awareness program at 6 different school namely Chamunda Secondary School, Khagendra Special Life Secondary School, Himshrinkha Academy School, Okhareni Secondary School, Gokarna Secondary School and Readers International Model School. which is located in ward 6,2,1,4, and 8 respectively. Total 332 students participated in the awareness program, among in School Health Awareness Program which was conducted on 4, 11, and 18 Jestha 2081.

Initially we introduced about the program, the organization and the activities ongoing at Gokarneshwor Municipality. Also, the purpose of awareness program among school children. We disseminated the knowledge on cancer, breast cancer and cervical cancer through interactive lecture, showing the videos, images of the respective content. Also, we distributed the brochures among all the students. We addressed the queries the students had and also repeated the session as per their request in which they would like to know further. We informed about the screening camp ongoing at Gokarneshwor Municipality for the women age group 30-60 years and to disseminate the information they learned today with their family and to encourage to receive the free service conducted jointly by AMDA Nepal and Gokarneshwor Municipality. Meanwhile, we also had discussion on menstrual hygiene, care during periods, perineal hygiene, and discussed on hazards occur due to junk food. Many of the students had the queries on irregular menstruation and vaginal discharge. We addressed all the queries of the students and encourage them to express and notify if there are any changes in health to their parents and advise for the checkup.

• Participants feedback/ suggestions/ opinions:

The students were glad to attend the session as this was quite important in their life as well to their family members. Also, they were aware about the imperative aspect of screening services, the hazardous activities and they should be caution on any abnormal symptoms seen in the body. Students were able to differentiate about good and bad health behaviors and also, address if there are any health issue rather than feeling shy and uncomfortable.

• Follow-up plan (if any):

Objective of the activity:			 To disseminate and bring awareness among community women regarding imperative aspect of breast & cervical cancer screening services. To empower women with knowledge about early detection, prevention, and available screening service 				

• Activity details

The educational activity on breast and cervical cancer screening program aimed to raise awareness, provide information, and promote early detection and prevention of these two prevalent forms of cancer.

Three educational events were conducted Gaurisankhar Sarasawotinagar Mahila Samuha, Grishasramik Parijat Sipamulka Mahila Samuha and Batuk Bairabha Mahila Samuha at Sarasawotinagar Samiti Sudhar Sagha, Kapan, Ward 6, Bairab Smriti Bhawan, Nayabasti-6 and Jaldevi Mandir Suntakhan, Ward 3 on 9, 23 and 30 Jestha 2081 respectively where 171 women participated from the Sarasawotinagar Samiti Sudhar Sagha, Kapan, Ward 6, Grishasramik Parijat Sipamulka Mahila Samuha and Batuk Bairabha Mahila Samuha.

During the program, we provided an overview of breast and cervical cancer, including risk factors, symptoms, and prevalence.

Key Highlights of the Program:

- ♣ Emphasized the significance of early detection in improving treatment outcomes and survival rate
- ♣ Discussed recommended screening guidelines for breast and cervical cancer, including mammography, clinical breast examination, USG and VIA tests
- → Explained the process and frequency of screenings based on age and risk factors, highlighted the benefits of regular screening in detecting cancer at an early stage when treatment is more effective
- ♣ Addressed common myths and misconceptions surrounding cancer screening, provided information about available screening services, including locations, scheduling appointments, and free costs of services
- ♣ Demonstrated breast self-examination techniques for breast and also on cervical health, empowering women to monitor changes and seek medical attention if necessary.

We also emphasized on the breast diagnostic screening camp that need to done at AMDA clinic for USG and Mammogram services after clinical examination. And importance of regular screening of both services after 3-year interval till the client reach 60 years old at nearby health facilities.

Moreover, we also facilitated an interactive Q&A session to address participants' questions, concerns, and personal experiences related to cancer screening and encouraged open dialogue and sharing of knowledge among participants

The educational activity on breast and cervical cancer screening services among Aama Samuha was highly successful in disseminating valuable information and fostering a sense of empowerment and responsibility towards health. Continued efforts are needed to ensure sustained engagement and uptake of screening services among women in the community.

Participants feedback/ suggestions/ opinions:

Participants were feeling grateful for such informative session and also expressed about their health seeking behavior. As this session had changed the view on screening services and need to do regularly for the optimum health of their own instead of going hospital after being ill. Also, all women assured that they will come to receive the service on schedule day.

Follow-up plan (if any): Not Any.

Activity details

4 **events** of one-day free breast & cervical cancer **screening camp** were conducted during this month Jestha 2081.

Key Activities:

- ➤ Preparation and Set Up: Prior to the camp, logistical arrangements were made, including venue selection, equipment setup, and staffing including educational session was conducted prior the screening camp.
- ➤ Registration: Women attending the camp were registered and provided with information about the screening process, including its purpose and benefits
- > Screening Services: Trained healthcare professionals conducted screenings for breast and cervical cancer using appropriate methods such as clinical breast examination, and VIA Test. Privacy and confidentiality were ensured throughout the screening process to maintain participants' comfort and dignity
- ➤ Referral: Individuals requiring further evaluation or treatment were referred to AMDA clinic for diagnostic screening services.

Findings:

A total of 283 women attended the camp and among them 283 clients benefitted from breast cancer screening service (BCSS) and 272 clients benefited from cervical cancer screening services (CCSS). Out of them, 7 clients were diagnosed with Benign Lump and 16 women clients were diagnosed with VIA positive. For which we had referred the clients for diagnostic screening services at AMDA clinic for colposcopy, USG and Mammogram services.

During screening camp at AMDA Clinic on 26 Jestha 2081, in total there was 150 clients visited for the services. We are unable to provide service to all due to quality assurance of the service. So, we recorded all the name of clients and ensured them for the service in the upcoming month.

Conclusion:

The screening camp for breast and cervical cancer screening services was successful in reaching and serving women in the community. By providing accessible screenings, education, and referrals, the camp contributed to efforts aimed at reducing the burden of these cancers and promoting women's health and well-being of Gokarneshwor Municipality.

- Participants feedback/ suggestions/ opinions:
 Clients were very glad to receive both cancer screening and diagnostic service nearby their locality and also glad to hear about free referral services.
- Follow-up plan (if any):
 To follow up the client for colposcopy, USG and Mammogram services.
