

**CTEVT**  
**AMDA Institute of Health Science**  
**Damak -2,Jhapa**  
**Nursing 3<sup>rd</sup> students observational visit report**

**Subject:-leadership and management**

**Date: 2082.03.32**

**Visited institutions:**

- i. Mechi Provincial Hospital, Bhadrapur, Jhapa, (2082.03.29)
- ii. District Hospital Inurwa, Sunsari (2082.03.31)

**Purposes of visit:**

The purpose of the visit was to observe the health care services delivery system, infrastructure, organogram, documentation and overall functions of the district and provincial level hospitals for academic and clinical learning alignment based on curriculum.

**Observations:**

**a. Provincial hospital (Mechi Hospital, Bhadrapur)**

Comparatively better structure (134 bedded hospital)

**b. Human resources:**

Adequate numbers of nurses in areas like ICU, OT, maternity, hemodialysis units.

- c. **Services:** On average, around 900 patients seek outpatient services, and more than 50 emergencies are handled daily. The hospital operates two oxygen plants, 13 hemodialysis machines, three intensive care units (ICUs), and 25 high-dependency units (HDUs). Services such as CT scans, ultrasound, endoscopy, and others are available here.
- d. **Documentation:** both manual and electronic health records observed.
- e. **cleanliness and waste management:** satisfactory, colored coded bins used in most departments

## **II. District Hospital Inurwa:**

- **Infrastructure:** old infrastructure (still 15 bedded hospital building). However, space constraints were noted in postoperative ward, pediatric ward)
- **Human resources:** 30 out of 59 permanent staff. Limited specialization services, many posts are not fulfilled. Specialization services are being provided by 'Samiti'.
- **Services:** Provided essential and other health services including OPD services, emergency, maternal and child health, surgeries, X-ray, USG, OCMC, ART, ARV, ATT, ECHO, ECG, lab, geriatric services etc.
- **Documentation:** electronic and manual both.
- **Cleanliness and waste management:** Implementation of autoclave machine for waste management.

Recently, construction of postmortem building with freeze; eye and dental unit extended, pediatric and general ward extended, and blood bank and ICU services extended.

## **Conclusion**

The visit provided valuable insight into the functioning of both district and provincial hospitals after federalism in Nepal. These visits will aid in enriching the teaching learning process for nursing students by integrating real clinical challenges and promoting community focused care.

## **Thankyou**
